Reward for Feedback

End of 2014 Offer

Your help is valuable. Share your feedback or experience of our Task Catcher Preview and you can order this program for under \$10 This

December 24, 2014

Bill,

Over 17 years ago WinPatrol™ was created to help protect computers, including my own. It has been successful preventing tens of thousands from possible infiltrations. I hope it has served you well.

I'm writing today to be sure everyone knows that WinPatrol has a new owner and a bright future. You may even see a new version soon!

BillP.com

I have always appreciated the response from everyone who uses my software. I will continue to share news on [BitsFromBill](#) and [BillP.com](#). You can also read my rants, recommendations and comments as my health allows via Twitter and Facebook. I've done well forecasting new trends and try my best to explain what I learn in human understandable terms.

WinPatrol PLUS continues Lifetime Support

Ruiware LLC proves to be a Trustworthy Friend

I've been successful keeping WinPatrol away from companies wanting to install toolbars and have rejected offers from devious installers wanting to take control of your computer. As an independent software developer it has often been a challenge to manage the development, marketing, public relations and still provide support to all customers. WinPatrol was the first program of its kind and is ready for a young healthy team so it will continue to grow.

special price will include both desktop and mobile devices.

Microsoft MVP

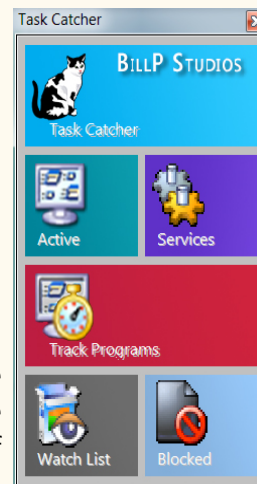

For the 7th year in a row, I've been honored with a "Most Valuable Professional" award from Microsoft. While the folks in Redmond share new technology I can't talk about, the friendship and compassion from other MVP's helped make 2014 a better year for myself and family.

Ruiware is a young company with the experience, knowledge and excitement WinPatrol needs. WinPatrol will become one of the featured products of [Ruiware LLC](#) along with their new [WinPrivacy](#) app. WinPatrol **PLUS** members will continue to receive free updates and full support from support@WinPatrol.com.

Task Catcher 2.0 Preview

Fans of Task Catcher have been patiently waiting years for improvements and they haven't been disappointed. Our preview version includes some great new tricks.

Blue Hat Evaluation

You'll also see references to our "Blue Hat Team" reports. This new service evaluates the risks and threats of personal attacks based on the software you depend on, your social engineering experience and the public exposure of your personal information.

Who's Targeting Your Company

Most companies don't see the dangers of including About Me information for company officers and board of directors. One of our largest retail stores was the target of a major credit card loss theft in 2014. They didn't lose data because of a sophisticated, talented programmer. They were a victim of having too much personal information on their company website. Access to their computer system was gained using social engineering to trick an employee with personal information available to anyone. Check out our [Blue Hat Service](#) to reduce your exposure.

Thanks again,

Bill Pytlovany
